

PAPERS FROM SIGNAL PROJECTS GROUP, CROYDON

NRM 1996-7909

FINDING AID

These lists were prepared in late 1997 by John Creed of the Signalling Record Society (www.s-r-s.org.uk) as a finding aid to the several thousand items comprising the collection. They do not seek to be a complete catalogue, but outline the types of document available and give a guide to locating specific information.

The contents can be broken down into four classes:

Individual signal box records, held in the Abolished Box files (see pages 2 and 47 of this guide) and the Agreement Diagram files (pages 47, 51), plus a small number in the General files (those items marked *, pages 49-50).

Signal Instructions, giving details and, usually, diagrams of new installations, as issued to railway staff (pages 43-46).

Contractors' Prints as supplied to the railway (page 48).

General files and drawings (page 49).

The following lists are arranged in numerical order of the 187 filing boxes in which the documents are stored; the box number should be quoted when requesting documents as individual files or drawings are not produced separately.

BOXES 1-92 - ABOLISHED BOX FILES

The first 92 filing boxes contain material related to abolished signal boxes, generally those closed between nationalisation and c.1990. The documents are filed in order of the serial numbers (one per signal box) used in the Southern Railway, and later the BR(SR), Signal & Telecommunications Drawing Office. There is normally only one copy of each drawing, showing the situation just prior to abolition of the box. (See the Agreement Diagram files, boxes 109-122 and 171-187, for historical runs of documents for certain signal boxes.)

Most commonly there is a signalling diagram for each box, bearing the plain serial number, possibly accompanied by one or more of the following items. These are numbered with the signal box serial number plus a suffix letter to denote the type of diagram:-

Cabling diagram	Suffix C	Scale plan of layout	Suffix P
Dog chart	Suffix D	Sykes' interlocking diagram	Suffix S
Electrical wiring diagram	Suffix E	Architectural drawing	Suffix V

Each filing box contains documents for a group (usually 20) of consecutive serial numbers. Not every serial number is represented, due both to some boxes having been abolished before this collection was started, and also to the few mechanical signal boxes still in service, for which the records were retained by Railtrack plc. The filing box numbers relate to signal box diagram numbers as follows:-

<u>Box</u>	<u>Serial Nos</u>	<u>Box</u>	<u>Serial Nos</u>	<u>Box</u>	<u>Serial Nos</u>	<u>Box</u>	<u>Serial Nos</u>
1	1-20	25	441-460	49	1081-1100	73	1591-1600
2	21-40	26	461-480	50	1101-1120	74	1601-1620
3	41-60	27	481-500	51	1121-1140	75	1621-1640
4	61-80	28	501-520	52	1141-1160	76	1641-1660
5	81-90	29	521-540	53	1161-1180	77	1661-1680
6	91-100	30	541-560	54	1177	78	1681-1700

8	111-120	32	581-600	56	1201-1220	80	1721-1750
9	121-140	33	601-620	57	1221-1240	81	1751-1760
10	141-160	34	621-640	58	1241-1260	82	1761-1780
11	161-180	35	641-660	59	1261-1280	83	1781-1820
12	181-200	36	661-680	60	1281-1300	84	1821-1860
13	201-220	37	681-700	61	1301-1320	85	1861-1880
14	221-240	38	701-720	62	1321-1340	86	1881-1900
15	241-260	39	721-740	63	1341-1360	87	1901-1920
16	261-280	40	741-760	64	1361-1380	88	1921-1940
17	281-300	41	761-780	65	1381-1400	89	1941-1960
18	301-320	42	801-885	66	1501-1510	90	1961-1980
19	321-340	43	899	67	1511-1520	91	1981-2000
20	341-360	44	1001-1020	68	1521-1530	92	56
21	361-380	45	1021-1030	69	1531-1540		
22	381-400	46	1031-1040	70	1541-1560		
23	401-420	47	1041-1060	71	1561-1580		
24	421-440	48	1061-1080	72	1581-1590		

The former LSWR area is covered by serial numbers in the range 1-780, signal boxes in the former LBSCR area are numbered in the range 1001-1400, and the SECR area boxes are numbered from 1501 upwards. A detailed index of serial numbers is provided on the following pages, split into these three sections. The lists are provided in both alphabetical and numerical order, but it should be noted that while they do contain all the signal boxes represented in this collection, these lists were originally compiled as comprehensive records of the numbering scheme, and also contain data for some signal boxes not covered by the Abolished Box files or elsewhere in this collection.

Exceptionally, Boxes 54 and 92 contain diagrams for two individual large signal boxes, Brighton and Waterloo respectively. Diagrams in the 800 series in Box 42 are control tables for stretches of automatic colour light signalling, while Box 43 contains items relating to the London Transport railway at New Cross Gate, notionally numbered 899.

Box 98

Various Southern Region system maps

Signalling Instructions for other regions, mainly NE

BOXES 99-108 - ABOLISHED BOX FILES

These ten boxes contain material similar to that in boxes 1-92, mainly for signal boxes abolished during the Southern Railway period. There is no particular order to the documents, which are mostly signalling diagrams or dog charts. The majority are for former LSWR locations, but in addition to LBSCR and SECR signal boxes, some GWR boxes transferred to the Southern Region after nationalisation are also included.

BOXES 109-122 - AGREEMENT DIAGRAMS

These fourteen boxes, and boxes 171-187, comprise mainly files of agreement diagrams, each file referring to one signal box. These are copies of the signalling diagram, often with the mechanical locking table (diagram number suffixed A) and electrical locking (suffix B), signed off by various departments to signify agreement with proposed signalling alterations. Most sets contain several successive alterations, often from around WW2 up to the abolition of the box; date bands are shown below. Some miscellaneous files on other topics are included in these filing boxes:-

Box 109

Clapham Jc A 1944-1990

Box 110

East Putney 1939-1991

Aeroflex Fuses

BOXES 123-154 - CONTRACTORS' PRINTS

These files contain prints of diagrams supplied to the SR and BR by various contractors, and are arranged partly by drawing serial number and partly by the name of the relevant contractor.

The majority of the items are general engineering drawings of signalling equipment and associated items such as cabling, power supplies, etc. A few site-specific items are also included.

Box 123

Serial numbers 1M - 50M

Boxes 151-154

AWS (Automatic Warning System)

BOXES 155-170 - GENERAL FILES

These sixteen boxes contain files on both general topics and specific locations. The latter include some signalling diagrams for minor branch lines, which might perhaps have been expected to appear in the Abolished Box files. Such material is indicated below with a *. (A similar file on the East Kent Light Railway is included in Box 111.)

Box 155

WR Locking Sketches 1967:
Pinhoe, Crannaforde Crossing, Whimble GFs, Feniton Crossing, Honiton, Seaton GF, Axminster Crossing, Chard, Hewish Crossing, Crewkerne Crossing, Yeovil Jc, Sherborne.
Multi-lamp Route Indicators
Point Heaters - Standard Drawings
Miscellaneous diagrams:
Waterloo CLS, London Transport, Orpington signal box

Box 156

GWR Standard Locking Frames
GWR Standard Signal Details

Box 157

GWR Standard Drawings:
Level Crossings, FPLs, Hand Generator, Detectors, Travelling Rollers, Pulleys, Compensators, Cranks & Bases.
Easton & Church Hope Railway - details of rock fall alarm

Box 158

LMR Diagrams: Standard Signals & Stencil Type Indicators

Box 159
